Envolve

Envolve is a geospatial and data management tool built for real estate and public involvement initiatives in support of capital projects. This proprietary software helps users manage external risk throughout the life of projects by collecting and organizing the information essential for project coordination and stakeholder relations. You can easily input and access a wealth of data, including interactions, workflows, negotiations, commitments and follow-ups.

With simple, flexible real-time reporting capabilities — supported by our experience-based insights — everyone from the field to the executive office is empowered to make informed decisions.

FULL INTEGRATION

- Manage stakeholder promises and expectations throughout large and complex projects.

- Seamlessly aggregate multiple data types to provide a unified environment for project work.

- Use on your mobile device or tablet for on-the-go access to stakeholder data and other information.

- Efficiently manage team resources with clear workflows, task assignments and follow-ups.

- Run real-time reports using interactive Power BI dashboards offering quick insight into communications, negotiations and stakeholder management spending.

- Easily access acquisition and entry status information to reduce potential liability and other legal issues.

- Quickly compile and deliver concise and current data to the C-suite and other stakeholders.

- Allow only validated users to access appropriate project data for added security.

Easy-to-use mobile and tablet interfaces provide access to vital project information anywhere you have connectivity.

BETTER DOCUMENTATION

- Save hours of data entry with bulk upload tools that help you efficiently enter communications and negotiation data for large groups of stakeholders.

- Centralize document management for property acquisition on capital projects.

- Better facilitate regulatory approvals by documenting meaningful engagement with stakeholders.

- Create better records for use in regulatory or legal proceedings.

HOW IT WORKS

Connect with us to develop an integration and documentation strategy.

Lean on our support structure throughout your project, from training and video tutorials to a support hotline.

We'll populate project parcel, stakeholder and organization information by importing existing GIS and publicly available data.

For users of Esri ArcGIS, we'll request your credentials for use in our secured environment. For others, we'll work with you to facilitate access.
