

FOR IMMEDIATE RELEASE**Burns & McDonnell Expands Oil, Gas & Chemical Leadership as Gulf Coast Engineer-Procure-Construct Projects Grow**

HOUSTON, Texas — [Burns & McDonnell](#), a 100% employee-owned engineering, architecture and construction firm, has named [Jason Hetherington](#) vice president of project delivery for its Oil, Gas & Chemical Group and [Randy Satterfield](#) regional manager for the group in the South Central Region.

The leadership appointments position the firm to meet growing demand for increasingly large and complex capital projects while strengthening the firm's integrated engineer-procure-construct (EPC) capabilities along the Gulf Coast and beyond.

"As our projects continue to grow in number, scale and complexity, strong construction and project delivery leadership is essential to helping our clients achieve their goals," says [Mark Swanson](#), senior vice president and general manager of the Oil, Gas & Chemical Group at Burns & McDonnell. "Jason and Randy bring decades of experience executing complex work, building high-performing teams and developing trusted client relationships. Their leadership will help us continue delivering projects safely, consistently and predictably."

In his new role, Hetherington will oversee project delivery across all [Oil, Gas & Chemical](#) Group offices and projects. He will focus on advancing consistent execution practices, strengthening project delivery teams and promoting proven approaches that support safety, quality, cost and schedule certainty throughout the project life cycle.

Hetherington began his Burns & McDonnell career as an intern before joining the firm as a mechanical engineer in 2005. Within six months, he relocated to Borger, Texas, for his first field assignment, beginning a career grounded in construction and safe project execution. He has since served in numerous project and leadership roles, including construction turnover coordinator, project engineer, EPC project manager, business unit leader and operations manager.

Since relocating to Houston in 2024, Hetherington has led the Oil, Gas & Chemical Group's regional operations and supported the delivery of complex EPC projects across the Gulf Coast.

"Our clients are undertaking critical projects that demand close coordination between engineering, procurement and construction from the very beginning," Hetherington says. "I look forward to building on the strength of our teams and advancing the consistent execution practices that help us deliver safe, predictable outcomes for our clients."

Satterfield succeeds Hetherington as regional manager for the Oil, Gas & Chemical Group in the South Central Region, based in [Houston](#). He is one of the foundational leaders who helped establish the firm's Oil, Gas & Chemical business along the Gulf Coast more than 19 years ago.

Throughout his career, Satterfield has held a variety of project and operational leadership roles. He served as project manager for the Houston team's first Oil, Gas & Chemical EPC project and most recently served as vice president and engineering director for the group in the South Central Region. His extensive experience and understanding of the region's people, projects and clients will support the continued growth of Burns & McDonnell construction and EPC services throughout the Gulf Coast.

"The Gulf Coast is home to some of the world's most important and complex industrial facilities," Satterfield says. "I'm proud of what our employee-owner team has built here and excited to continue bringing together our engineering and construction expertise to help our clients execute the projects that will shape the region's future."

About Burns & McDonnell

Working from more than 75 offices around the world, Burns & McDonnell designs and builds critical infrastructure. Our family of companies — driven by engineers, construction professionals, architects, planners, technologists and scientists — delivers projects grounded in safety and a desire to make a difference as we make our clients successful. Founded in 1898, Burns & McDonnell is 100% employee-owned. Learn more at burnsmcd.com.
